

## FOR IMMEDIATE RELEASE

KickBeat GamesCom Update!

### *New Gameplay Video and Partial Soundtrack Reveal*

KickBeat is an experimental rhythm game featuring fully 3D characters and combat and high-energy music. The game is being demoed in the Zen Studios meeting room this week at GamesCom. KickBeat won Destructoid's E3 Best Rhythm Game award.

A new KickBeat gameplay video is available for download from the KickBeat [press site](#), or it can be linked from the [Zen Studios YouTube Channel](#). This video demonstrates how KickBeat is played using the D-pad controls, and highlights how fully 3D models have replaced arrows and colored buttons as gameplay queues.

KickBeat features a hard-hitting soundtrack comprised of 18 licensed tracks, and today we are happy to reveal a partial track list:

- Pendulum – Self vs. Self
- Marilyn Manson – The Beautiful People
- Rob Zombie – Scum of the Earth
- Voicians – The Construct
- Shen Yi – War Dance
- Celldweller – I Can't Wait
- Styles of Beyond – Nine Thou
- Southpaw Swagger – It's Showtime
- Blue Stahli – Ultranumb

Additionally, KickBeat features a music analyzer tool that allows players to generate new KickBeat tracks with their existing music library!

KickBeat is expected to release Fall 2012, exclusively for PlayStation®Vita.
